SHARP

UP-X200

Introducing the UP-X200 **wireless POS handheld terminal** from Sharp Electronics, the **perfect** companion for **hospitality solutions** using the Sharp UP-X500 and running Maitre'D software

From one of the world technology leaders comes the lightweight, ergonomically designed UP-X200. This wireless, handheld terminal has been designed for restaurant and food service operators who require mobility, ease of use and the most from their POS system.

Maximize flexibility and expandability

- Stable and wireless operating system, Windows® CE.Net 4.2, enables applications such as Internet Explorer® 6.0, J-script® 5.5, Microsoft®Word® or POS utilities such as touch panel calibration and volume control
- Store daily specials and full menus with robust memory of 128MB shared RAM (64MB flash ROM) expandable with USB flash media drive
- Multiple audio options include earphone, microphone or speaker

Minimize downtime for greater profitability

- Maitre'D version SP6 right out of the box
- Understandable graphical interfaces such as menus, floor management with real time table status, wait list management and connection to front and back office applications
- Cover up to a nine hour shift with long-lasting rechargeable dual 1700 mAh batteries

Increase order processing efficiency

- Enhance visibility and improve accuracy with 4" true color VGA LCD operator display; 16-bit color resolution accurately displays graphics and menus
- Perfect for outdoor use in bright sunlight – menus are crystal clear to read and order entry is easy
- Fulfill orders faster by automatically sending orders to the kitchen or bar with wireless 802.11b connections to Ethernet LAN
- Access critical managerial information anywhere or anytime using 802.11b wireless connectivity
- Eliminate the need for handwritten orders with prompt tableside order entry using a familiar numeric keyboard

Experience Sharp's world-class reliability

- "Commercial-grade solution" is IPX2 rated; rugged cabinet design is sealed and protected against sprayed water or food spills; in addition it will withstand many types of drops from up to 4'

Access Maitre'd Back Office from anywhere in the restaurant.

Maitre'd allows you to configure screens to fit the aspect ratio of the UP-X200.

Performance and speed
